

How to size a ring

The European ring size is actually the diameter of the inside of the ring:

Size 16 corresponds to 16mm.

So you take a ring that fits well, you measure the inner diameter and you have your ring size. So very simple.

Your ring should fit your finger comfortably; snug enough so that it will not fall off, but loose enough to slide over your knuckle.

Finger size changes depending on the time of day and the weather. For best results measure your finger size:

- At the end of the day and when your fingers are warm (Fingers are smaller in the early morning and when cold.)
- The measure of a ring is also determined by the width of the ring, a wide ring (8 mm) can differ a half or whole size to a narrow ring (4 mm).
- Measure finger size 3 to 4 times to eliminate an erroneous reading.

Women's rings typically range from size 16,5 to 17,5.

The most commonly purchased men's ring sizes 20,5.

Once the ring is ordered, it cannot be returned. Please so pay attention very well on what size you specify
